The house is a two story, frame, Federal building with a hipped-roof. The three bay facade has the entrance in the west bay; it has transom and sidelights. The windows are 6/6 double hung sash with unmoulded surrounds. The double chimneys rise between the entrance and center bay, for fireplaces positioned along the hall partition wall.

There is a 1-1/2 story, frame tenant house with a three bay facade and one exterior chimney on the east end. The porch has a shed roof continuing the slope of the house roof. The center doorway is flanked by 6/6 double hung sash windows. The other windows in the building are 4/4 double hung sash.

In plan, the house has two rooms on the first floor.

In the northwest corner of the west room is a boxed staircase to the second floor. The loft is ceiled above the collars with twelve clapboards, the beaded edge of which is laid-up.

The collars have an open face, half dove-tail over the rafters.
